With treatments being at the very heart of the brand, Guinot prides itself on remaining at the forefront of both machine-based and manual treatments. Over 40 years ago, Guinot introduced to the world the first machine-based facial which uses galvanic and high-frequency technology, known today as the award-winning Hydradermie². This has now been replaced and updated with Hydraderm Cellular Energy. Guinot has since led the way in treatment innovations and due to its pharmaceutical heritage is continually adapting and developing their product and treatment formulas to ensure they provide only the best results. With outstanding clinical trial results, clients will see a difference in their skin.
